

IN THE CLAIMS

Please amend claim 1 and cancel claims 2 and 31. This listing of claims will replace all prior versions, and listings, of claims in the application.

1. (Currently Amended): An isolated nucleic acid molecule selected from the group consisting of:

a) a nucleic acid molecule comprising the nucleotide sequence of any of SEQ ID NO:51, SEQ ID NO:52, and the nucleotide sequence of the clone deposited as ATCC Accession PTA-424, or a complement thereof~~a nucleic acid molecule comprising a nucleotide sequence which is at least 95% identical to the nucleotide sequence of any of SEQ ID NOS: 51, 52, and the nucleotide sequence of the clone deposited as ATCC Accession number PTA-424 or a complement thereof; and~~

b) a nucleic acid molecule which encodes a polypeptide comprising the amino acid sequence of SEQ ID NO: 53, or[[and]] the amino acid sequence encoded by the nucleotide sequence of the clone deposited as ATCC Accession number PTA-424.

2. (Canceled)

3. (Original): The nucleic acid molecule of claim 1, further comprising vector nucleic acid sequences.

4. (Previously Presented): The nucleic acid molecule of claim 1 further comprising nucleic acid sequences encoding a heterologous polypeptide.

5. (Original): A host cell which contains the nucleic acid molecule of claim 1.

6. (Original): The host cell of claim 5 which is a mammalian host cell.

7. (Original): A non-human mammalian host cell containing the nucleic acid molecule of claim 1.

8-11. (Canceled)

12. (Previously Presented): A method for producing a polypeptide comprising the amino acid sequence of SEQ ID NO:53 or the amino acid sequence encoded by the nucleotide sequence of the clone deposited as ATCC Accession number PTA-424, the method comprising culturing the host cell of claim 5 under conditions in which the nucleic acid molecule is expressed.

13-30. (Canceled)

31. (Canceled)

32-43. (Canceled)

44. (Previously Presented): A method for producing a polypeptide encoded by the nucleic acid molecule of claim 1, comprising
culturing the host cell of claim 5 under conditions in which the nucleic acid molecule is expressed.

45-46. (Canceled)
